I would work with various legislators to seek solutions and implement them for Arizona's future.

Q14: Do you understand the relationship between infrastructure and the economy? Please explain.

When infrastructure is built and/or maintained, the economy benefits with persons having jobs, the tax base growing in the community where the project is being built and local businesses providing services for the project.

Q15: Do you support or oppose government spending for the purposes of investment in public infrastructure (e.g., transportation, water resources, water infrastructure, public facilities, state/local buildings, etc.)?

We all pay and use the infrastructure that is built and we need to continue to build and maintain it for the current and future populations of Arizona.
